- Teak leaves

Critical Quality Requirements (Very Important)

Because this product is used in animal habitats, strict hygiene standards are required.

A. No Chemical Treatment

- No pesticides
- No chemical preservatives
- No fumigation residues

B. Cleaning & Sorting

- Leaves must be visually inspected
- Remove damaged or moldy leaves
- Remove dirt, sand, and foreign materials

C. Thermal Treatment (Mandatory)

Leaves must undergo heat treatment to eliminate:

- Insect eggs
- Parasites
- Mites
- Larvae

Recommended:

- 85–100°C hot air treatment
- 45–60 minutes

Please confirm if this process can be implemented.

D. Moisture Control

- Moisture measurement per batch
- No risk of mold growth
