

# Company Profile

Strong Bonds. Trusted Solutions.

From farm to global markets Frozex supplies premium fresh and frozen fruits and vegetables through advanced IQF processing, strict quality control, and reliable cold-chain logistics.

Premium quality • Tailored solution • Affordable

## Vision

To lead the transition toward responsible and sustainable sourcing of fresh and frozen food for the global food markets

## Mission

To source, process, and supply fresh and frozen food through controlled, compliant, and sustainable operations, delivering consistent quality and food safety to the international partners.

8 Years of experience

50+ partners

25 premium products

6,000 tons per product

# Our Story

Founded in 2018 as **Al-Farida Establishment**, the company was established with a clear objective: to deliver high-quality food solutions with strong nutritional value, grounded in scientifically supported agricultural practices. From inception, the organization implemented internationally recommended agricultural requirements and modern farming methodologies to ensure product quality, safety, and consistency across the value chain. Operations extended beyond cultivation to include rigorous supervision of post-harvest handling, processing, and packaging, minimizing quality loss and safeguarding nutritional integrity. To ensure accountability and compliance, the company developed a structured monitoring and guidance system supporting all production stakeholders. This framework was aligned with internationally recognized agricultural and food safety standards, reinforcing operational transparency and traceability.

In Jan 2026, as part of a strategic growth and capital expansion initiative, the establishment transitioned into a joint-stock company under the name **Frozex**. This transformation marked a new phase of institutional maturity, expanded operational scale, and structured engagement with regional and international markets.

# Why Frozex?

- **Integrated Farm-to-Market Supply Chain** - From agricultural consulting and farm management to processing, packaging, and international export, Frozex manages the entire value chain to ensure consistent quality and reliable delivery.
- **8 Years of Industry Experience**
- **Strong Production Capacity** – 6,000 tons per product annually.
- **Premium Quality & Food Safety Standards** follow internationally recognized systems including HACCP, BRC, ISO 9001, ISO 22000, GlobalG.A.P, and FDA
- **Advanced IQF Freezing Technology** - we rapidly freeze products at peak freshness to preserve natural taste, texture, color, and nutritional value while extending shelf life.
- **Strict Quality Control & Full Traceability** - Each stage of production from raw material selection to final export is monitored through structured quality control checkpoints to guarantee safety, consistency, and transparency.
- **Reliable Cold Chain Logistics** - Temperature controlled storage and transportation protect product integrity from harvest to international delivery.
- **Flexible Product Customization** - tailored solutions customized cuts, calibers, special mixes, packaging formats, and private label options based on customer specifications.
- **Consistent Year-Round Supply** - Through strategic crop planning and strong partnerships with growers, we ensure stable production and dependable supply across seasons.
- **Long-Term Partnership Approach** - we focus on building long-term partnerships by delivering reliable quality, transparent communication, and responsive service to support our clients' growth in global markets.

## What We Deliver

### Agricultural Consulting & Farm Management Services

Precision from Soil to Harvest

- Strategic Farm Assessment: Soil, water, and land analysis to define optimal crop direction.
- Production & Crop Planning: Seasonal variety selection with expert-led yield and quality targets.
- Performance & Climate Intelligence: Data-driven monitoring of productivity, waste, and weather patterns.
- Nutrient & Crop Protection Strategy: Optimized fertilization and preventive pest control aligned with export standards.
- Precision Scheduling: Structured planting and harvesting to stabilize supply and reduce market risk.
- Resource & Energy Optimization: Smart irrigation systems and solar-powered solutions to lower costs and increase efficiency.

### Food Processing "IQF"

individually Frozen. Naturally Preserved.

Our Individual Quick Freezing (IQF) technology preserves freshness, texture, and nutritional value by rapidly freezing products at peak maturity. This process minimizes cellular damage, maintains product integrity, and ensures extended shelf life without compromising quality. By combining advanced freezing systems with strict food safety protocols aligned with global standards such as BRC, HACCP and ISO, we deliver safe, consistent, export-ready products to international markets.

### Packaging Solutions

Engineered Protection. Market-Ready Presentation.

Our packaging solutions are designed to protect product integrity while enhancing brand presentation and logistics efficiency. From bulk industrial formats to retail-ready packaging with our partners private label we ensure durability, traceability, and compliance with international food packaging standards. Through optimized material selection and cold-chain compatibility, we support product stability from processing facilities to global distribution channels.

# Our Production cycle

Our production cycle is built on precision, efficiency, and uncompromising quality. It begins with careful seed selection, and the use of EU-approved fertilizers to ensure sustainable and compliant cultivation. We then follow strict food processing protocols through to final packaging, with every stage closely monitored to guarantee consistency and adherence to international standards. Rigorous quality control procedures including systematic laboratory checks at critical control points safeguard product safety, integrity, and performance. This disciplined, end-to-end approach enables us to deliver reliable, high-standard solutions our partners can trust.

# Accreditations & Compliance

Globally recognized systems for food safety, quality, and export readiness

**HACCP**

Hazard Analysis &  
Critical Control Points

**BRC**

Brand Reputation  
Compliance Global  
Standard for Food  
Safety

**ISO**

International  
Organization for  
Standardization (  
Quality management &  
Food Safety  
Management System)

**FDA**

**FDA** – U.S. Food &  
Drug Administration  
regulatory compliance

**GlobalG.A.P.**

Good Agricultural  
Practices certification  
for farm-level safety

# Product Portfolio

Premium quality of Fruits & Vegetables

## Fruits

Strawberry  
Mango slice  
Mango cubes  
Pomegranate  
Guava pulp  
Mango Pulp  
Strawberry pulp  
Concentrated Orange 65%

## Vegetables

|                  |                            |
|------------------|----------------------------|
| Green bean       | Spinach                    |
| Peas             | Artichoke                  |
| okra             | Sweetcorn                  |
| Jute leaves      | Broccoli                   |
| Mixed vegetables | Cauliflower                |
| Carrot           | Peas with carrot           |
| Onion            | French fries               |
| Garlic           | Special mix (upon request) |
| Cucchini         | Bell Pepper                |

Customization available: calibers, cuts, and special mixes can be produced upon request.
